

<p><b>1. South Gate</b></p>  <p>Our walk starts and ends at the South gate. Go through the gate and turn right.</p>	<p><b>2. Monkey Puzzle Tree</b></p>  <p>These are from Chile and Western Argentina in South America. Trees like this grew in dinosaur times!</p>	<p><b>3. Dandelion</b></p>  <p>Dandelions are great for pollinators so you might see bees, hoverflies or butterflies near them.</p>	<p><b>4. Laurel</b></p>  <p>Laurel is in several places in the park. You can see plain and variegated (spotted leaf) versions.</p>
<p><b>5. Birch Tree</b></p>  <p>We loved the stripy bark on this tree.</p>	<p><b>6. Blackbird nest box.</b></p>  <p>Blackbirds nest 3 to 4 times a year so you may see a new group of chicks. Male blackbirds have orange beaks and females have brown beaks. The babies make a beeping noise and the parents <a href="#">click</a> to distract predators.</p>	<p><b>7.Green Alkanet</b></p>  <p>Bees like these flowers.</p>	<p><b>8.Yew</b></p>  <p><b>Very poisonous</b> to humans and other mammals (so keep any pets away!). Yew is great for birds!</p>
<p><b>9. Giant Red Wood</b></p>  <p>The tallest trees in the world are <b>Giant Red Wood</b> trees. They are from California and can grow 50 to 80 m tall!</p>	<p><b>10. Feverfew</b></p>  <p>Feverfew is great for pollinators!</p>	<p><b>11.</b></p>  <p>We thought this tree trunk looked like an elephant's foot!</p>	<p><b>12 Buddleia.</b></p>  <p>This kind comes from China and Japan. Butterflies love them!</p>
<p><b>13. Holly</b></p>  <p>Caterpillars and spider mites can sometimes be found on prickly holly bushes.</p>	<p><b>14. Rose</b></p>  <p>Pollinators love these roses! The hips</p>  <p>(rose fruit) make great food for birds too!</p>	<p><b>15. Monterey Pine</b></p>  <p>This tree is originally from California and Mexico.</p>	<p><b>16. Beech?</b></p>  <p>We think this could be a beech tree. Grey squirrels often collect food near these large trees.</p>
<p><b>Common Pollinators</b> spread pollen so plants can make new seeds. Look out for them!</p>			
<p><b>Hover fly</b></p>  <p>These hover in the air like helicopters. They are stripy like wasps but do not sting!</p>	<p><b>Bees</b></p>  <p>There are lots of different kinds of bee. They are all great pollinators and won't sting if you don't touch them.</p>	<p><b>Butterflies</b></p>  <p>This is a gatekeeper butterfly. There are loads of different kinds of butterfly.</p>	<p>If you enjoyed this walk, <a href="#">Wildlife Watch</a> do some lovely spotters guides! We liked: <a href="#">Butterfly Detective</a> &amp; <a href="#">Beetle Detective</a>. Friends of the Earth also do a lovely <a href="#">bee identification sheet</a></p>
